NVDA Screen Reader Software

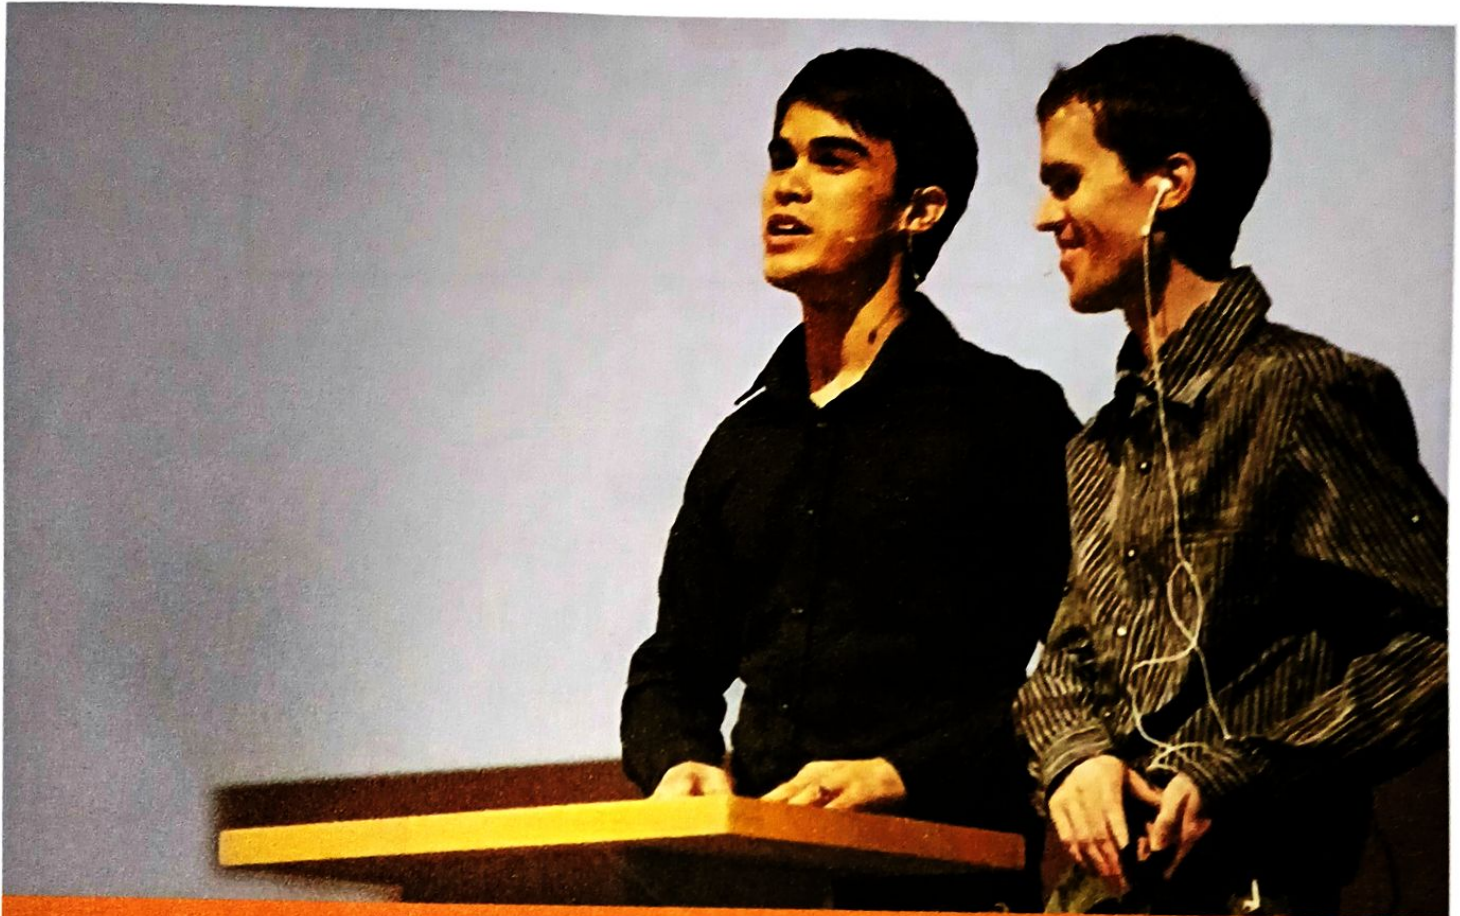

NVDA is a free and open-source, portable screen reader for Microsoft windows. It is available in 62 languages. It is programmed by Python. It is licensed under the GNU General Public License version 2. It is the second most popular screen reader in use throughout the world, more popular in developing countries like India.

The college has taken initiative to use the screen reader for differently abled students admitted to the college. It has been installed in IQAC, Library and all the departments of the college for the beneficiaries. The website of the institute (www.psgvpasc.ac.in) is compatible with the NVDA software.

WE BELIEVE THAT
every Blind + Vision Impaired person
DESERVES THE RIGHT TO
freely & easily access a computer!

WE CREATE THE SOFTWARE WHICH MAKES THAT POSSIBLE

NVDA: The free software empowering blind people world wide

THE FACTS

Millions of People

There are 285 million blind & vision impaired people in the world. They all have amazing gifts to contribute to society, but they need the right tools to realise their dreams.

Technology Is The Key

Technology opens up so many doors. But for those of us without sight, computers don't work straight out of the box. Software called a "screen reader" is needed to translate visual information verbally, so we can make sense of what is on screen.

\$\$\$

The Issue

Unfortunately many screen readers cost thousands of dollars — often more than the computer itself. This holds millions of people back from affording to use a computer and discovering their potential.

A Free Solution

We have spent the last 12 years developing the global solution: a free, high quality screen reader, accessible to all! We have already enabled 100,000+ people to gain freedom, education and employment!

WHAT OUR USERS SAY

"I am so thankful for the creation of NVDA. It has really changed my life. With NVDA, I do not have to worry about spending tons of extra money on third party software to use a computer. I can purchase any new computer that I want, and I can use it for the same cost as a sighted person."

– Reina Brown, United States

NV Access is a registered charity and software development company.

We are the creators of NVDA, a free, open source, globally accessible screen reader for the blind and vision impaired.
